

## Technical Data Sheet

### Zinc Adipate Hexanedioic acid zinc salt

CAS NO: 3446-35-3

M.W. 209.5 g/mol

<u>Test</u>	<u>Specification</u>	<u>Method</u>
Appearance	White Powder crystals	Visual
Purity	98.0% minimum	Cymer Test
% Free Acid	<0.100%	Cymer Test
Moisture	0.50% maximum	Karl Fisher
Screen analysis	100% pass through 45 mesh	Cymer Test

Zinc Adipate is used as a stabilizer in PVC and Nylon thermal plastics and as a corrosion inhibitor when added to thermal plastic resins. Zinc Adipate has also been used in the field of nano particles.
